#### ABSTRACT

PROBLEM TO BE SOLVED: To provide a method for the partial view change (making detail or simple) of a document on a WW W (world wide \*web\*) reading software without newly developing a hyper \*text\* \*display\* \*function\* , or transferring a document through a communication path each time.

SOLUTION: A script for deleting the \*content\* of a document (101) and for outputting almost the same \*content\* as that of the document to the document (103, 104, 105, 106, 107) is described in a document to be displayed. This script is described so as to be activated by a hyper link or a button in the document. When the script is activated by the click of the hyper link or the button for instructing making detail, data obtained by making detail one part of a document are outputted, and when the script is activated by the click of the hyper link or the button for instructing making simple, data obtained by making simple one part of the document are outputted.
